

## STATEMENT OF PRINCIPLES AND FELLOWSHIP REQUIREMENTS SOUTHERN SOCIETY FOR CLINICAL INVESTIGATION

### **Introduction**

The SSCI is an organization of clinical investigators, biomedical scientists, and clinician educators whose goal is to promote quality academic scholarship by conducting an annual meeting, encouraging the participation of young investigators in this meeting, and publishing a monthly journal, *The American Journal of the Medical Sciences*.

### **Requirements**

Fellowship is open to individuals living in the United States or its territories with MD, PhD, DO, or PharmD degrees based on broad academic criteria that are considered by the Council prior to its annual meeting. In general, the SSCI is interested in attracting Fellows at or above the Assistant Professor level who have demonstrated meritorious scholarly activities with promise for, or evidence of, academic leadership. Recognizing that academic medicine has multiple distinct career pathways - clinical research, basic science research, educational scholarship/research, or combinations of the three - the SSCI has established different selection criteria based on an individual's primary academic focus.

For those whose career emphasizes research (basic science or clinical investigation), criteria such as research independence and originality, publications, independent grant support, and local/regional/national academic recognition will be examined more closely than clinical activities.

For clinician educators/scholars, criteria such as clinical teaching responsibilities, curriculum development, academic leadership appointments, scholarly activities, and recognition as a clinical academic authority will be weighed more heavily than traditional research criteria. The applicant will select which pathway best defines their career path and, thus, which set of criteria will be weighed most heavily by the Council. Members of the ASCI and AAP are automatically given fellowship upon application.

### **Guiding Principles of Fellowship**

Fellows assume an obligation to actively continue in medical scholarship. They shall pay membership dues, have voting privileges, and may hold office. They shall receive all regular communications of the Society. Fellows are expected to manifest sustained interest in the Society by attending the annual meeting on a regular basis.

At the time new Fellows are notified that they have been elected to SSCI fellowship status, the notification will ask them to accept this offer contingent upon the following commitments: (i) attendance at the annual meeting at least two out of every four years; and (ii) agreement to pay dues annually.

### **Nomination Instructions**

All applicants must be nominated, and their nomination seconded, by Fellows of the SSCI through the online nomination form located at [www.ssciweb.org](http://www.ssciweb.org). The individuals nominating and seconding should be Fellows knowledgeable in the nominee's area of emphasis (investigator or educator).

#### **A complete nomination package consists of:**

- Completed “Application for Fellowship” form, including selection by the nominee of the pathway that best describes his/her academic career (see Requirements above) and a brief statement explaining why the nominee seeks Fellowship in the SSCI.
- A complete and current curriculum vitae.
- A nominating form from a Fellow of the SSCI (see Nomination Instructions.)
- A seconding form from a Fellow of the SSCI (see Nomination Instructions.)

(Electronic version of nomination application form may be obtained from [www.ssciweb.org](http://www.ssciweb.org).)

### **Nomination Deadlines**

The Fellowship nomination deadlines are April 15 and August 15 of each year.
